OBJECTIVE

Motivated Junior Python Developer with a strong foundation in backend development, seeking to leverage expertise in **Flask**, **SQLAlchemy**, and **Odoo** to build scalable web applications and ERP systems. Committed to clean code, efficient problem-solving, and collaborative development using **Git**.

TECHNICAL SKILLS

- **Programming:** Python (Intermediate), C, Jinja2.
 - **Web & Backend:** Flask, Flask-WTF, Flask-Login, RESTful APIs (Postman).
 - **Version Control:** **Git**, **GitHub** (Branching, Commits, Repository Management).
 - **GUI & Tools:** Tkinter, PyCharm, Linux (Command Line).
 - **Databases:** SQLite, PostgreSQL (Relational Design, CRUD operations).
 - **Odoo Development:** Custom module structure, XML views, and Access Control .
-

PROJECTS

Top Movies Web Application

- Developed a full-stack website using **Flask** and **SQLite** to manage a personal movie library.
- Implemented full **CRUD** functionality, allowing users to add, edit, and delete movie records dynamically.

- Managed source code and versioning through **GitHub**.

Secure Authentication System

- Built a user management system featuring secure registration and login using **Werkzeug** for password hashing.
- Managed user sessions and persistent logins utilizing **Flask-Login**.

Desktop Application Development (Tkinter)

- Designed and implemented functional GUI applications using **Tkinter** to improve user interaction and interface logic.
- Integrated backend Python scripts with frontend desktop components.

EDUCATION

Bachelor's Degree in Information Technology Management

- Canadian International College (CIC), Egypt (Graduation: 2024).

100 Days of Code™: The Complete Python Pro Bootcamp (Udemy)

- Comprehensive training covering web development, data science, and backend automation.

CS50's Introduction to Computer Science (Harvard/edX)

- Rigorous foundation in algorithms, data structures, and software engineering principles.
